STAND OUT FROM THE PACK

JACKAL™ FLASH MTVBJKGKPS

THE JACKAL™ SERIES REPRESENTS THE ULTIMATE LEVEL OF HIGH PERFORMANCE AND THE JACKAL™ FLASH IS AN INCREDIBLE ADDITION. IT IS THE STRONGEST ASYMMETRIC PEARL THAT MOTIV® HAS EVER DEVELOPED. WHEN BOWLING ON HIGHER VOLUMES OF OIL WITH A SOLID ASYMMETRIC BALL LIKE THE JACKAL™ GHOST OR ALPHA EDITION, THE BALL YOU TRANSITION TO SHOULD PROVIDE A SIMILAR STRENGTH, BUT BE CLEANER THROUGH THE FRONT OF THE LANE WITH A FASTER RESPONSE ON THE BACKEND. AND THAT IS PRECISELY WHAT THE JACKAL™ FLASH IS BUILT FOR.

WESLEY LOW MAKES HISTORY!

On July 19, 2020 Wesley Low shot a 900 series with his Alpha Jackal™ to become just the 37th bowler in history to shoot a certified 900 series.

“To join a short list of people in bowling’s history is quite the honor and something I never thought that I could accomplish during my lifetime. To achieve this perfection and share it with my MOTIV® family is something I will remember forever.”

100% AMERICAN MADE

Need length with ridiculous angle? We have it. Need a heavy oil monster that doesn't quit on the backend? We have that too! Our goal at MOTIV® has always been to provide the broadest spectrum of ball motion options under a single brand. We currently utilize 13 different core designs and 15 cover stock formulations, all made in Muskegon, MI.

MICROCELL INNOVATION

We created the new microcell polymer cover category to create balls that shape like urethane and have backend continuation like reactive resin. Microcell Polymer is a new technology that absorbs oil, unlike traditional urethane, but at a fraction of the rate of reactive resin. This allows for more mid-lane read and greater continuation than urethane. This technology is currently available on the Tank™ Blitz, Desert Tank™, and Covert Tank™.
